

Different Voices

Lyrics by Don Black

Section 1

Different Voices all around
Every one a different sound
Some are big and some are small
Some are never heard at all
Different Voices old and young
All have songs that should be sung
If no one can hear your voice
There's no reason to rejoice

Section 2

Different Voices time to speak
Build the dream that we all seek
Use your voices let them know
How far we're prepared to go
Different Voices follow me
Show them how strong we can be
There are changes we can bring
All we have to do is sing

Section 3

Different voices old and young
All have songs that should be sung
All our voices in the end
Are pure magic when they blend
When different voices become one
You feel that you could touch the sun
Different voices strong and free
Come let's sing in harmony
And as the barriers fall
You'll find that different voices
Are not really different at all.
