## Chamber Music

### Ensemble MidtVest

The music on this CD confirms the special position of the composer **Jørgen Jersild (1913-2004)** in Danish music. It is captivating chamber music written over a half-century during which the composer underwent great musical development, but at the same time persisted in his own personal style – from the early works from the 1930s and 1940s to the later string quartet showing us a courageous, mature composer seeking out new musical areas.
