

First released on Marco Polo 8.223102 in 1987

This recording features two little-known works by Arnold Bax, who in the years following the First World War was regarded as one of the leading figures in contemporary British music. Both the *Sinfonietta* (originally titled *Symphonic Phantasy*, and withdrawn by the composer and never performed during his lifetime) and the slightly earlier *Overture, Elegy and Rondo* bear all those hallmarks of his mature style that his admirers will recognise.
