

DAVID ANGUS

Great Men and Women in the HISTORY OF MEDICINE

Read by **Benjamin Soames**

Illness, disease and injury prompted the development of medicine from the earliest days of mankind: useful herbs, methods for treating wounds and even setting bones were passed down the generations by word of mouth. With the growth of civilisation came more scientific methods, generally discovered by significant individuals.

This informative and entertaining audiobook presents the major figures in the history of medicine, from Hippocrates in Ancient Greece to the Roman doctor Galen, the medieval abbess Hildegard of Bingen and the Arabs Ibn Sina and Al-Razi. They are succeeded by Andreas Vesalius and his anatomical investigations during the Renaissance, and subsequently by William Harvey (the circulation of the blood), Edward Jenner (inoculation), before the discovery of penicillin and DNA.

This is one of the most fascinating stories in human history and, as this audiobook shows, one of the most varied – and exciting!

Benjamin Soames trained at LAMDA. He has read *The Tale of Troy*, *The Adventures of Odysseus*, *Tales from the Greek Legends*, *Great Rulers of Ancient Rome*, *Great Scientists and their Discoveries*, *Great Inventors and their Inventions* and *Stories from Shakespeare: The Plantagenets* for Naxos AudioBooks.
