# AN ENQUIRY CONCERNING HUMAN UNDERSTANDING

Read by **Hugh Ross**

As intriguing today as when it was first published, Hume's *An Enquiry Concerning Human Understanding* is a fascinating exploration into the nature of human knowledge. Using billiard balls, candles and other colourful examples, Hume conveys the core of his empiricism: that true knowledge can only be gained through sensory experience. No other philosopher has been at the forefront of the mind than David Hume; physics, psychology, neuroscience – connections to Hume are everywhere. Here is the book that Immanuel Kant confessed had awoken him from his 'dogmatic slumber'.

**Hugh Ross** trained at RADA and has worked extensively in theatre, film and television. His film credits include *Trainspotting*, *Charlotte Gray* and *The Iron Lady*.
