Read by **Benjamin Soames**

Following the success of the first *Great Scientists* title in the 'Junior Classics' range, this collection features the lives of nine more remarkable scientists, with descriptions of their discoveries. From the astronomy of Copernicus and Halley to the natural science of Linnaeus and Humboldt, and from the discoveries of Pascal, Davy, Volta and Babbage to the harnessing of atomic power by Julius Oppenheimer, it explores the contributions made by these great scientists, and their impact on our everyday lives.

Benjamin Soames trained at LAMDA. He has read *The Tale of Troy*, *The Adventures of Odysseus*, *Tales from the Greek Legends*, *Great Rulers of Ancient Rome*, *Great Scientists and their Discoveries*, *Great Inventors and their Inventions* and *Stories from Shakespeare: The Plantagenets* for Naxos AudioBooks.

*'This is a marvellous snapshot of nine of the world's greatest inventors.
A fascinating and, with luck, inspiring audio.'*
